Our goals for this conference include

- Recognize the purpose of charting.
- Identify important items to include on a chart to increase legal protection for the provider.
- Review the risks of extraneous and redundant charting.
- Understand how a 'hard stop' at the medical decision making can improve patient safety.
- Address controversial areas of EM documentation such as whether to include a differential or to document that the department is busy.
- Use an actual legal case with trial testimony to demonstrate important patient safety principles of documentation.
